1. the Schedule for the FFS is still on target for Nov. 14th
2. Removal Update
3. Need to schedule FFS working session 11/30?

+ Army Corps is ~~analyzing~~ revising soil volumes that will need to be excavated and
+ Corps is revising cost estimates ~~& Risk Assessments~~ ~~which~~ based on ~~+ RCRA ARARs~~ new soil volumes.

The format may look different than the cost estimate that Weston prepared but it will include the same type of information for each of the alternatives

treated. The new volume will ~~likely~~ be somewhat lower than the 124,000 yd³ previously calculated. This is primarily due to data collected during the FFS that showed contamination does not extend as at depth in land treatment area. So you'll see that change in revised FFS.

I am incorporating all of this information into the revised document.

Risk Assessment-

Dr. Smith will be calculating the last pieces of the risk assessment as I stated in the cover memo to the Oct 6 risk document. Right now all the region 3 toxicologists are working on another project that is a very high priority for the Region so I'm not certain exactly when Dr. Smith will be able to finalize this work at SMWT. I can say that. I will forward the info to the community as soon as its

AR500497

completed and that we will make every effort to get it to you ~~well~~ before the Task Force working session so that you'll have the complete package to evaluate

December 1? – Task Force Meeting

* Dave Kongbo – soil model report.
  send to Co. & Hirshhorn

Soil Volumes – background info will be backup in FPS

Terry Stilman –
- have pumped trench to see what's going on
- have made decision to pump from trench & send to treatment system as well as water from pond
- system is running continually rather than in batch

Dec. 7 – next conf. call 11:00 AM

5 + 1 to Hirshhorn

By end of month – – gov't equipment – everything down there
– should have O&M plan by end of Nov.
– ready for Corps. about mid-Jan.
