Re: Cleanup of Keystone Landfill in Union Township, Adams County.

Dear Sir:

As landowners on Barts Church Road with our land in close proximity to Keystone Landfill, we are writing, with deep concern, as are many others in this area and asking you to do all in your power to deny the expansion of this landfill by voting against phase II.

Whenever we are staying in this area we carry our water for drinking as well water in area has been contaminated.

It is really a sad situation to behold when the whole city of Hanover (30,000+ pop.) is in jeopardy of having contaminated water as the Longpoint Dam is within a three mile radius of this landfill. I fear for our future generations and feel this must be a real concern of yours too.

I recently participated in a cancer survey through "the Cancer Research Foundation of America" and was surprised to find that Penna is the fourth worst state for cancer risk. I wonder if ~~we~~ we are doing enough to cut down on this risk. Please help.

Thank you.
