Subject: Reserve Landfill / Community Relations Field Trip
From: Victor J. Janosik, RPM
To: file

On Wednesday, 7/22/87, EPA Community Relations representative Kay Germann and I drove to the site and visited residences immediately surrounding the site. Our purpose was: (1) to inform residents that EPA would soon begin Remedial Investigation activities at the site; (2) to ease any fears that the residents are or would be in any immediate danger; (3) to inform land and crop owners that wells might have to be placed in fields which are presently utilized for agriculture.

Kay and I were informed, and the information was confirmed, that all crops being grown immediately adjacent to and immediately south of Old Rt. 23 relative to the site are the property of Mr. Dennis Schaffer. Also, those lands are the property of Mrs. Arlene Schucker. Kay and I visited Mr. Schaffer at his farm and Mrs. Schucker at the Clover leaf Motel (which she apparently owns) and informed them of the Remedial Investigation and ~~and~~ the possibility that the placement of monitoring wells might result in the destruction of crops and the restricting of the use of the land occupied by the wells.
