- discuss phase III wetlands

- concerned about source of high organics that are tying up the metals - is it man made that may not always exist

- should have solid phase test
  ie. chironomid (?)

  also ~~use~~ need to I.D. benthos to species to determine if some are pollution tolerant

- would like to review phase IV work plan

- need Eh, pH ... data to determine chemical species to see if in form that is toxic

- see ~~the~~ letter report to be dated week of 4/9 for complete comments

Aside note: ~~[illegible] review group does not [illegible]~~
