99399

October 6, 1969

Mr. Joseph Bell Averzano
Delaware Land and Gravel Co., Inc.
229 Grantham Lane
New Castle, Delaware 19720

Dear Mr. Bell Averzano:

Enclosed you will find your Certificate of Approval to operate an industrial landfill for solid waste. Your application to dispose of liquid waste was disapproved by the Commission on September 23, 1969.

The nature of the liquid waste is not sufficiently detailed to ascertain the characteristics, possible reactions, odor problems and ground water contamination effects. Your location coupled with your proposed method of operation is not favorable for liquid waste disposal.

I suggest that you advise your clients that they should explore alternate means for liquid waste disposal, such as approved incineration or deposition in an approved disposal area specifically authorized to accept chemical or toxic waste.

If you should have any question, please contact the Wilmington office at 658-9251 ext. 381 or the Dover office at 734-5711 ext. 573.

Sincerely yours,

Hugh J. Monghi, Chief
Engineering Services Section
Air Pollution Control Division
